November 15th, 2014 9:00AM to 3:00PM

# Capitalism and philanthropy can collaborate to solve big problems: We will never succeed in improving the world through pure capitalism nor pure philanthropy. Durreen hopes to show us how to succeed through the meshing of the two.

#### Mahboob Mahmood

Educating the World: With the goal to educate 1 billion children, Mahboob is not only burning to share his ideals with us, but to show us why they're necessary for a better tomorrow.

#### Ayesha Khanna

She is a technology, urbanisation and education expert with over 15 years of experience. Ayesha will give us an insight into the future of employment.

## Johnson Chen

With his company Clearbridge
Accelerators on the forefront of
scientific research, Mr. Chen is here
to explain one of their most amazing
inventions to date.

#### Aaron Maniam

The Toggling Leader: Thoughts of a Curious Generalist. Aaron was a diplomat, political strategist and is now a director at the ministry of trade. Plus, he's an Oxford Graduate and an award-winning poet, there's not much Aaron can't do, and that includes giving a TED talk.

## **Ned Phillips**

The Now: How using something that doesn't exist can improve your performance. A must attend talk for those who can barely drag themselves out of bed, Ned will teach us that its not only our legs that need a work out, but our minds too.

## Samarth Chawla

Rethinking Consumerism: Samarth attempts to give us a new point of view on some of the issues that plague consumerism. Whose fault is it anyway?

## Dave Munro

The population boom in China in 2012 will result in a housing boom in 2030. A modern-day fortune teller, David Munro will give us an insight into demographics and what they tell us about the future.

# Naila Segule

Naila's multi-racial background has led her to explore the many factors that shape one's identity and explore the concept of a post-racial world.

#### Dr Ray Dunn

Genome Sequencing Technologies and Genetic Disease: genome sequencing has revolutionised biomedical research, permitting the identification of genes underlying rare birth defects and genetic determinants of diseases like Type I Diabetes.

## Abhisvara Sinha

These Walls that Define Us: From the Berlin Wall to a teenager's insecurities, Abhisvara reveals the barriers that exist in our minds and our lives.

# Akshay Smit

Limitations of Logic: Akshay will be guiding us through the headache-inducing thoughts of Kurt Gödel and his answer to one of logic's biggest paradoxes.
